Overview

Vendor Product Attribute Addon for CedCommerce Multi-Vendor Marketplace allows the vendors to create their own attributes and assign them to the Attribute set being provided to them. The vendors now have the power to manage the functionalities of their Attribute Sets without the intervention of the admin.

The vendor will be able to see only the attributes created by him and can also edit or delete them as well. The Vendor Product Attribute addon is dependent on Vendor Product Addon; therefore, CedCommerce Multi-Vendor Marketplace and Vendor Product Addon should be pre-installed.

Enable/Disable Vendor Product Attribute

To enable the Vendor Product Attribute Addon, just select “Yes” in the “Enable Vendor Product Attribute System” dropdown and click on “Save Config” button to save the system configuration settings. Selecting “No” will disable the Vendor Product Attribute Addon and its features won’t show up on frontend.

The screenshot shows the 'Vendor Configuration' page with a 'Save Config' button in the top right. Under the 'General' tab, there are four configuration items, each with a dropdown menu set to 'Yes' and a '[WEBSITE]' label to its right:

Configuration Item	Value	Label
Enable Vendor System	Yes	[WEBSITE]
Enable Vendor Product Attribute	Yes	[WEBSITE]
Enable Vendor Vacation Addon	Yes	[WEBSITE]
Enable Advance Product System	Yes	[WEBSITE]

A callout bubble points to the 'Enable Vendor Product Attribute' dropdown with the text: **Select Yes to enable Vendor Product Attribute.**

New Product

Whenever a new vendor gets registered, a product attribute is assigned to him by his name. The vendor can select his attribute set so that it gets assigned to the product created.

iii. Manage Label/Options

The label of the product attribute should be specified here both for admin and frontend (default store view).

Manage Label / Options

If you do not specify an option value for a specific store view then the default (Admin) value will be used.

Admin	Default Store View			
<input type="text" value="color"/>	<input type="text" value="color"/>			

Admin	Default Store View	Position	Is Default	
<input type="text" value="Black"/>	<input type="text" value="Black"/>	<input type="text" value="2"/>	<input checked="" type="radio"/>	<input type="button" value="Add Option"/>
<input type="text" value="Blue"/>	<input type="text" value="Blue"/>	<input type="text" value="2"/>	<input type="radio"/>	<input type="button" value="Delete"/>
<input type="text" value="Red"/>	<input type="text" value="Red"/>	<input type="text" value="1"/>	<input type="radio"/>	<input type="button" value="Delete"/>

After filling in all the details “Save Attribute” button should be clicked to save all the details. When the attribute will be saved, it will be listed in the “Manage Attributes” section in the admin panel under the attribute set of the vendor who created it.

ii. Edit Attribute

The attribute being created can also be edited by clicking on its respective row in the “Vendor Attributes” grid. After that, the changes to be made can be specified and “Save Attributes” should be clicked to save the changes made.

iii. Delete Attribute

To delete the product attributes, the “Edit Attribute” page should be opened and “Delete Attribute” button should be clicked. The product attribute will get deleted.
