Overview

Vendor Correios Shipping is an addon for CedCommerce Multi-Vendor Marketplace. The Correios shipping manages the Brazilian postal code system. It provides the various shipping methods with delivery time also. This extension is very useful for vendors in case they want to set correios shipping for their products. This module is dependent on Vendor Multi Shipping Addon. With the help of this module vendor can allow different correios shipping methods for their products. Vendor has the authority to enable or disable this functionality for their products. Vendor has to set the shipping address then only the customer will see the correios shipping rate for the vendor's products. Admin has full control over this module and can enable or disable this functionality.

Since this is an Addon and is dependent on Vendor Multi Shipping Addon therefore, CedCommerce Multi-Vendor Marketplace and Vendor Multi Shipping Addon have to be installed before installing Vendor Correios Shipping otherwise, this addon won't function properly.
