Overview

Vendor Inventory Management is an addon for CedCommerce Multi-Vendor Marketplace. It will provide flexibility to the vendors to manage the stock for his products. With this addon, the vendor can set Minimum Quantity through which he will be able to see all the products having Stock less than minimum quantity. This module has the following functionalities: -

- Vendor can set Minimum quantity for his products.
- Vendor can see all his out-of-stock products and manage them.
- Vendor can see all his low-stock products having stock less than minimum quantity and manage them.
- Vendor can also see his total products including low-stock-products and out-of-stock products.
- Admin will have full control over this addon.

Configuration Settings

The configuration settings can be opened from **CsMarketplace > Vendor Configuration** in the menu section.

i. Enable Vendor Inventory System

When set to Yes, Vendor Inventory Management Addon will be enabled and the vendor will see the inventory management settings on his vendor panel. Otherwise this option will not be available for vendor.

General		
Enable Vendor System	<input type="text" value="Yes"/>	[WEBSITE]
Enable Vendor Registration	<input type="text" value="Yes"/>	[WEBSITE]
	▲ If you don't want further vendor, then disable the vendor registration.	
Enable Vendor MultiShipping System	<input type="text" value="Yes"/>	[WEBSITE]
Enable Advance Product System	<input type="text" value="Yes"/>	[WEBSITE]
Enable Vendor Inventory System	<input type="text" value="Yes"/>	[WEBSITE]

Vendor Configuration

When the Vendor Inventory Management Addon has been installed and configured by the admin, then the vendor can configure the inventory management in the vendor panel. Firstly, the vendor has to set minimum quantity in their panel.

To open this page, login as vendor and go to the **left navigation bar, Vendor Inventory > Manage Inventory.**

The screenshot shows the 'INVENTORY SETTINGS' page. At the top right, there is a green 'Save Inventory' button. Below the title, there is a section titled 'Inventory'. Underneath, there is a bullet point labeled 'Minimum Quantity Amount*'. Below this label is a text input field containing the number '4500'.

i. Minimum Quantity Amount

From here the vendor can set the minimum stock for his products. Below this quantity, all the products will be considered low-stock products.

Out of Stock Products

Vendor can see his out-of-stock products list by going to the **left navigation bar, Vendor Inventory > Out of Stock Products.** In this grid vendor can see his products having stock '0'.

Select All | Unselect All | Select Visible | Unselect Visible Actions

0 items selected

	ID	Name	Type	Price	Qty	Status
Any	From: <input type="text"/> To: <input type="text"/>	<input type="text"/>	<input type="text"/>	To: <input type="text"/> In: <input type="text" value="USD"/>	From: <input type="text"/> To: <input type="text"/>	<input type="text"/>
<input type="checkbox"/>	6	newtest 	Simple Product	\$45,454,545.00	0	Pending
<input type="checkbox"/>	5	test 	Simple Product	\$343.00	0	Pending

Low Stock Products

Vendor can see his low-stock products list by going to the **left navigation bar, Vendor Inventory > Low Stock Products**. In this grid vendor can see his products having stock less than the minimum quantity set by vendor.

Total Products

Vendor can see his total products list (including out-of-stock and low-stock products) by going to the **left navigation bar, Vendor Inventory > Total Products**. In this grid vendor can see all his products including low-stock and out-of-stock products.

Low Stock Product Notification

Through this addon, vendor will get notifications every day by email that his product is going to be out-of-stock, so that he can manage his stock.
