## Overview

CedCommerce Vendor Distance Based Shipping Extension is an Addon for CedCommerce Multi-Vendor Marketplace. This extension is very useful for vendors in case they want to set distance based shipping for their products. This module is dependent on Vendor Multi Shipping Addon. With the help of this module vendor can allow different Settings like setting cost, setting allowed countries etc. of their products. Vendor has the authority to enable or disable this functionality for their products. Vendor has to set the shipping address then only the customer will see the distance based shipping rate for the vendor's products. Admin has full control over this module and can enable or disable this functionality. This method uses Google Api for calculating the distance. You can calculate driving distance between any two place all over world (the store address should be correct). **This module will calculate distance only when there is a driving route between store address (from) and shipping address (to).**

Since this is an addon and is dependent on Vendor Multi Shipping Addon therefore, CedCommerce Multi-Vendor Marketplace and Vendor Multi Shipping Addon have to be installed before installing Vendor Distance Based Shipping otherwise, this addon won't function properly.

## Configuration Settings

The configuration settings can be opened from **CsMarketplace > Vendor Configuration** in the menu section.

### i. **Enable Distance Based Shipping for Vendor**

When set to Yes, vendor distance based shipping will be enabled and vendor will see this option in vendor shipping method panel. Otherwise royal mail shipping will not be available for vendor.

Vendor Multi Shipping		
Carrier Title	<input type="text" value="Marketplace Rates"/>	[WEBSITE]
	▲ Vendor MultiShipping Carrier Title	
Method Title	<input type="text" value="Multi Shipping"/>	[WEBSITE]
	▲ Vendor MultiShipping Method Title	
<b>Vendor Shipping Carriers</b>		
Enable Distance Based Shipping(Per km) For Vendor	<input type="text" value="Yes"/>	[WEBSITE]
	▲ Before Enabling this please enable Distance Based Shipping Method	

## ii. Enable the Default Distance Based Shipping Method

This module is based on the Magento default distance based shipping method. So this distance based shipping method should be enabled by the admin. Admin can enable the distance based shipping method by going to the **System -> Configuration -> Shipping Method** section. Here you will see the “Distance Based shipping” group and set the “Enabled” field to “yes”. Now the vendor Distance Based shipping will be available to the vendor and the customer will see the vendor distance based shipping.

Distance Based Shipping(Per Km)		
Enable Distance Based Shipping	<input type="text" value="Yes"/>	[STORE VIEW]
Title	<input type="text" value="Shipping based on distance"/>	[STORE VIEW]
Method Title	<input type="text" value="Total price for this shipment"/>	[STORE VIEW]
Store Address	<input type="text" value="Sydney,2000,Sydney,Australia"/>	[STORE VIEW]

## Vendor Configuration

When the Vendor Distance Based Shipping addon has been installed and configured by the admin, then vendor can configure distance based shipping method in the vendor panel. Firstly, the vendor has to set the shipping settings in their panel. In it they have to set their shipping address.

### SHIPPING SETTINGS

SAVE CANCEL

#### ORIGIN ADDRESS DETAILS

**Country \***  
Australia

**State/Province \***  
New South Wales

**City \***  
Sydney

**Zip/Postal Code \***  
2000

[« Back](#) \* Required Fields

Then he can set the shipping method setting in vendor panel. To open this page, login as vendor and go the **left navigation bar, Settings -> Shipping Method.**

**SHIPPING METHODS** SAVE CANCEL

**DISTANCE BASED SHIPPING(PER KM)**

**Active \***

No

**Title**

Shipping based on distance

**Method Title**

Total price for this shipment

**Address Calculation**

Only Postal code, City & Country

**Metric**

Kilometer

**Distance(Round Off)**

2 decimal

### i. Active

From here vendor can enable/disable the distance based shipping method for their products. If it is disabled, then rate from shipping methods enabled from admin will be calculated.

### ii. Title

Here the vendor can set the title for their method.

### iii. Method Title

Here the vendor can set the Method Title for their method visible to customer.

#### iv. Address Calculation

Here the vendor can set that Full Address or Only Postal code, City & Country will be used for calculating the distance.

#### v. Metric

Here the vendor can set that Distance will be calculated in Kilometer or Miles.

#### vi. Distance (Round Off)

Here the vendor can round off the calculated distance.

**Total Price(Round Off)**

2 decimal

**Shipping Zones**

To  From  Price  Type  [Remove](#)

To  From  Price  Type  [Remove](#)

**Use Minimum and Maximum**

Yes

**Minimal Price**

**Maximum Price**

**Maximum Distance (km/miles)**

## vii. Total Price (Round Off)

Here the vendor can round off the calculated price up to selected figures.

## viii. Shipping Zones

Here the vendor can add the zones according to which vendor wishes to calculate the price. If vendor will fill this field, only then the rates will be calculated. For Example, let the Distance calculated be 20 Km then shipping price for the above two zones will be:

1. If the zone is 10-20 and type is fixed then the price calculated will be 20, after that we will calculate the difference of zone ( $20-10=10$ ) and subtract it from distance ( $20-10=10\text{km}$ ).
2. The price for remaining distance i.e. 10 km according to zone 20-30 and type is per/metric will be calculated as  $30*10=300$ .

So, the shipping price will be  $320(20+300)$ .

## ix. Use Minimum and Maximum

Here the vendor can enable or disable the use of minimum and maximum shipping price.

## x. Minimal Price

Here the vendor can set the minimum shipping cost. If the shipping cost is less than the minimum price then the minimum price will be used as shipping cost.

## xi. Maximum Price

Here the vendor can set the minimum shipping cost. If the shipping cost is greater than the maximum price then the maximum price will be used as shipping cost.

## xii. Maximum Distance

Here the vendor can set the maximum distance for the shipment of the products. If the distance is greater than the maximum distance, then this method will not be applicable.

**Enable Free Shipping**

No

**Minimum Order Amount For Free Shipping**

500

**Enable Minimum Order Amount**

Yes

**Minimum Order Amount**

500

**Allowed Country**

India

[« Back](#)

\* Required Fields

### xiii. Enable Free Shipping

Here the vendor can enable/disable the use of free shipping.

### xiv. Minimum Order Amount for Free Shipping

If free shipping is enabled, then vendor can set the minimum order amount above which free shipping will be applied.

#### xv. **Enable Minimum Order Amount**

Here Vendor can enable the minimum order amount.

#### xvi. **Minimum Order Amount**

If minimum order amount is enabled, then vendor can set the minimum order amount above which this shipping method will be applicable.

#### xvii. **Allowed Country**

Here vendor can set the countries allowed for the particular shipping method.

## **Distance Based Shipping on Cart Page**

Customer will see vendor wise distance based shipping on the cart page. This module is dependent on Vendor Multi Shipping addon, so you must install multi shipping. In the attached snapshot you can see that there are two products in the cart associated with different vendors. Here you will see the vendor “abc” has enabled the distance based shipping for his products. So the customer will see vendor wise distance based shipping for this vendor. If any vendor has not enabled any shipping method then the customer will get the rates defined by the admin for the vendor’s products.
