Overview

CedCommerce Vendor Free Shipping module is an addon for CedCommerce Multi-Vendor Marketplace developed in Magento 2. This extension is very useful for vendors in case they want to set free shipping for their products. This module is dependent on Vendor Multi Shipping Addon. It is very similar to the Magento 2 default free shipping method.

With the help of this module vendor can define minimum order amount for free shipping of their products, as well as vendor can set country for the free shipping of their products. Vendor has the authority to enable or disable this functionality for their products. Vendor has to set the shipping address then only the customer will see the free shipping rate for the vendor's products. Admin has full control over this module and can enable or disable this functionality.

Since this is an Addon and is dependent on Vendor Multi Shipping Addon therefore, CedCommerce Multi-Vendor Marketplace and Vendor Multi Shipping Addon have to be installed before installing Vendor Free Shipping otherwise, this addon won't function properly.

Configuration Settings

The configuration settings can be opened from **Marketplace > Vendor Configuration** in the menu section.

i.   Enable Free Shipping For Vendor

When set to Yes, vendor free shipping will be enabled and vendor will see this option in vendor shipping method panel. Otherwise free shipping will not be available for vendor.

ii. Enable the Default Free Shipping Method

This module is based on the Magento 2 default free shipping method. So this free shipping method should be enabled by the admin. Admin can enable the free shipping method by going to the **Stores > Configuration > Sales > Shipping Method** section. Here you will see the "Free shipping" group and set the "Enabled" field to "yes". Now the vendor free shipping will be available to the vendor and the customer will see the vendor free shipping for vendor products if vendor enables free shipping.

Vendor Configuration

When the Vendor Free Shipping Addon has been installed and configured by the admin. Then vendor can configure the free shipping method in the vendor panel. Firstly, the vendor has to set the shipping settings in their panel. In it they have to set their shipping address. Then he can set the shipping method setting in vendor panel.

To open this page, login as vendor and go the **left navigation bar, Settings > Shipping Method**
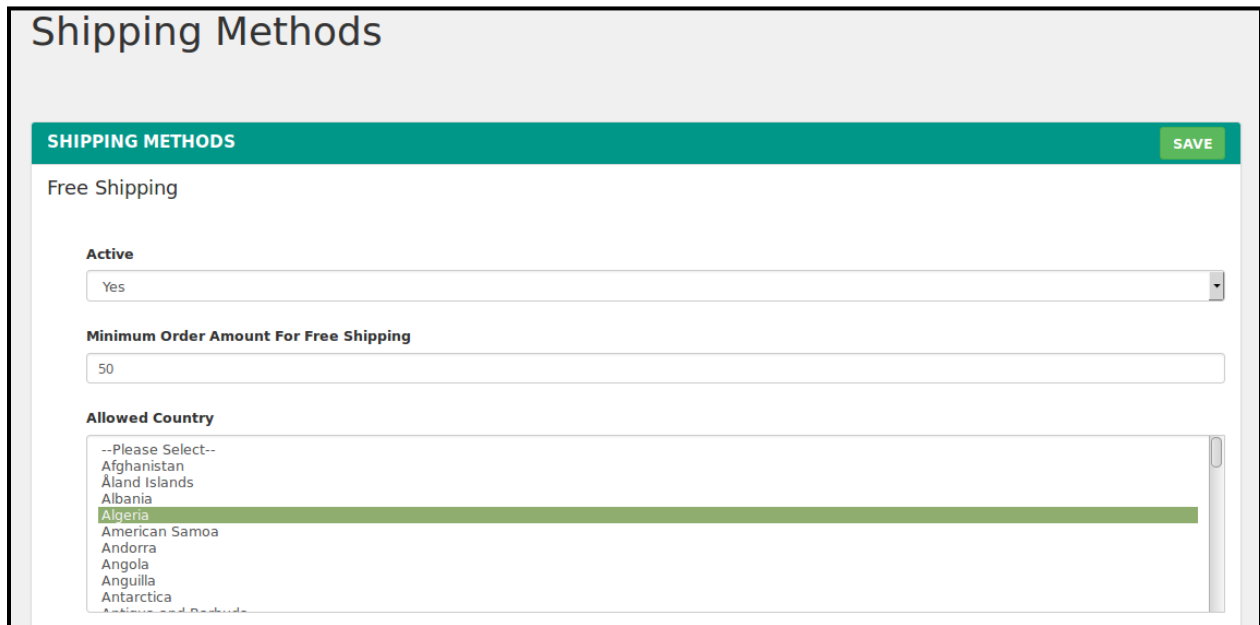

i. Active

From here the vendor can enable/disable the free shipping method for their products.

ii. Minimum Order Amount For Free Shipping

Here the vendor can set the minimum order amount for their products to allow free shipping. This is an optional field. If the vendor wants to put such a restriction for free shipping then he can set it.

iii.   Allowed Country

Here the vendor can set the countries for which he wants to allow free shipping.

Free Shipping on Cart Page

Customer will see vendor wise free shipping on the cart page. This module is dependent on Vendor Multi Shipping Addon, so you must install multi shipping already. In the attached snapshot you can see that there are two products in the cart associated with different vendors.

Here you will see the vendor "Walker" has enabled the free shipping for his products. So the customer will see vendor wise free shipping for this vendor. If any vendor has not enabled any shipping method then the customer will get the rates defined by the admin for the vendor's products.

Ronald Walker

⊙ Free Shipping $0.00

Main Website

○ Fixed $20.00

⊙ test $15.00

○ Worldwide Expedited $98.00

○ Worldwide Express Saver $102.69

○ Free $0.00

Subtotal	$92.00
Shipping (Ronald Walker - Multi Shipping)	$15.00
Order Total	**$107.00**

Go to Checkout

Free Shipping on Checkout Page

After enabling the Multi Shipping Addon and Free Shipping Addon the customer will get vendor wise shipping rate on the checkout page which will be similar to the ones shown below. Here the customer will have to select one shipping method from every group.

Free Shipping on Multi Shipping Checkout

When customer checkouts with multi address shipping then cart item is divided into different parts based on the address selected. Here we can see that there are 2 products (2 quantities of same product) which have to be shipped on different addresses. If vendor free shipping is enabled for the vendor products then the customer will see the shipping rates like this
