Overview

MageNative Mobile App Magento® 2 extension provides a flexibility and an easiest way to build the mobile app. With the help of the MageNative app, the admin can convert the Magento® 2 website into a featured mobile app consisting of all the website functionalities.

MageNative is the Application Development Platform that enables to present the website in the Mobile Application Environment. The admin can customize the app to match the brand image and publish it to meet the requirements of the front-end users.

The app displays the product information in an interactive way and uses the less data to show the product related information.

This application is compatible with the following operating systems:

- Windows
- Android
- ios

Note  : It is available with the free trial version for the Ninety days.

The key features of the MageNative Mobile App extension are as follows:

- **Attractive and User-Friendly Layout:** Provides an attractive and user-friendly layout that makes the users to instinctively experience, how to use the interface.
- **Multi Lingual and RTL Support:** It supports multiple languages and the right to left theme. In the right to left theme, writing starts from the right of the page and continues to the left.
- **Native App:** An application program, developed for the use on a specific platform or device.
- **Synchronization:** The app is synchronized with the website.
- **Supports all product type:** It supports all type of the products available in the Magento 2 store.
- **Search:** Enhanced search feature available to search the required product in the app based Name, description, Category of the product.
- **Barcode And QR Code Reader and Scanner:** **QR Code Reader** is used for Product sharing and easy product search. **Barcode Scanner** is used for the Real world product search.
- **Push Notification:** Using **Push Notification** the MageNative App sends the user a notification message regarding any new offer or any other app related messages without the user actually opening the app. The notification is pushed to the mobile to draw the user's attention towards the latest happening in the app, even when the screen of the tab or mobile is locked, and the app that is pushing the notification is closed.
- **Social Login:** A single sign-on technology is used that allows users to authenticate themselves on MageNative App by connecting through a social media such as Facebook and Google. Thus, offering an option to register, log in with their regular social login ID and password rather than going through the regular process of registration for using the App.

- **Native Payment Gateway:** Will provide the NATIVE PAYMENT GATEWAYS that will make the application run smoothly and even faster on the transactions performed by the users.
- **Voice Search:** You can search the product with your own voice.

Other Efficient Features are as follows:

- Support all the payment method available on the Magento 2 store.
- Homepage Promotional Banner
- Promotional Deals
- Product Social Sharing
- Google Maps
- Google Analytics
- Customize App Design
- Filters
- Sort

Mobiconnect Menu

After the successful app building and the connector installation, the Admin can view the **MOBICONNECT** menu on the left navigation bar of the Admin panel.

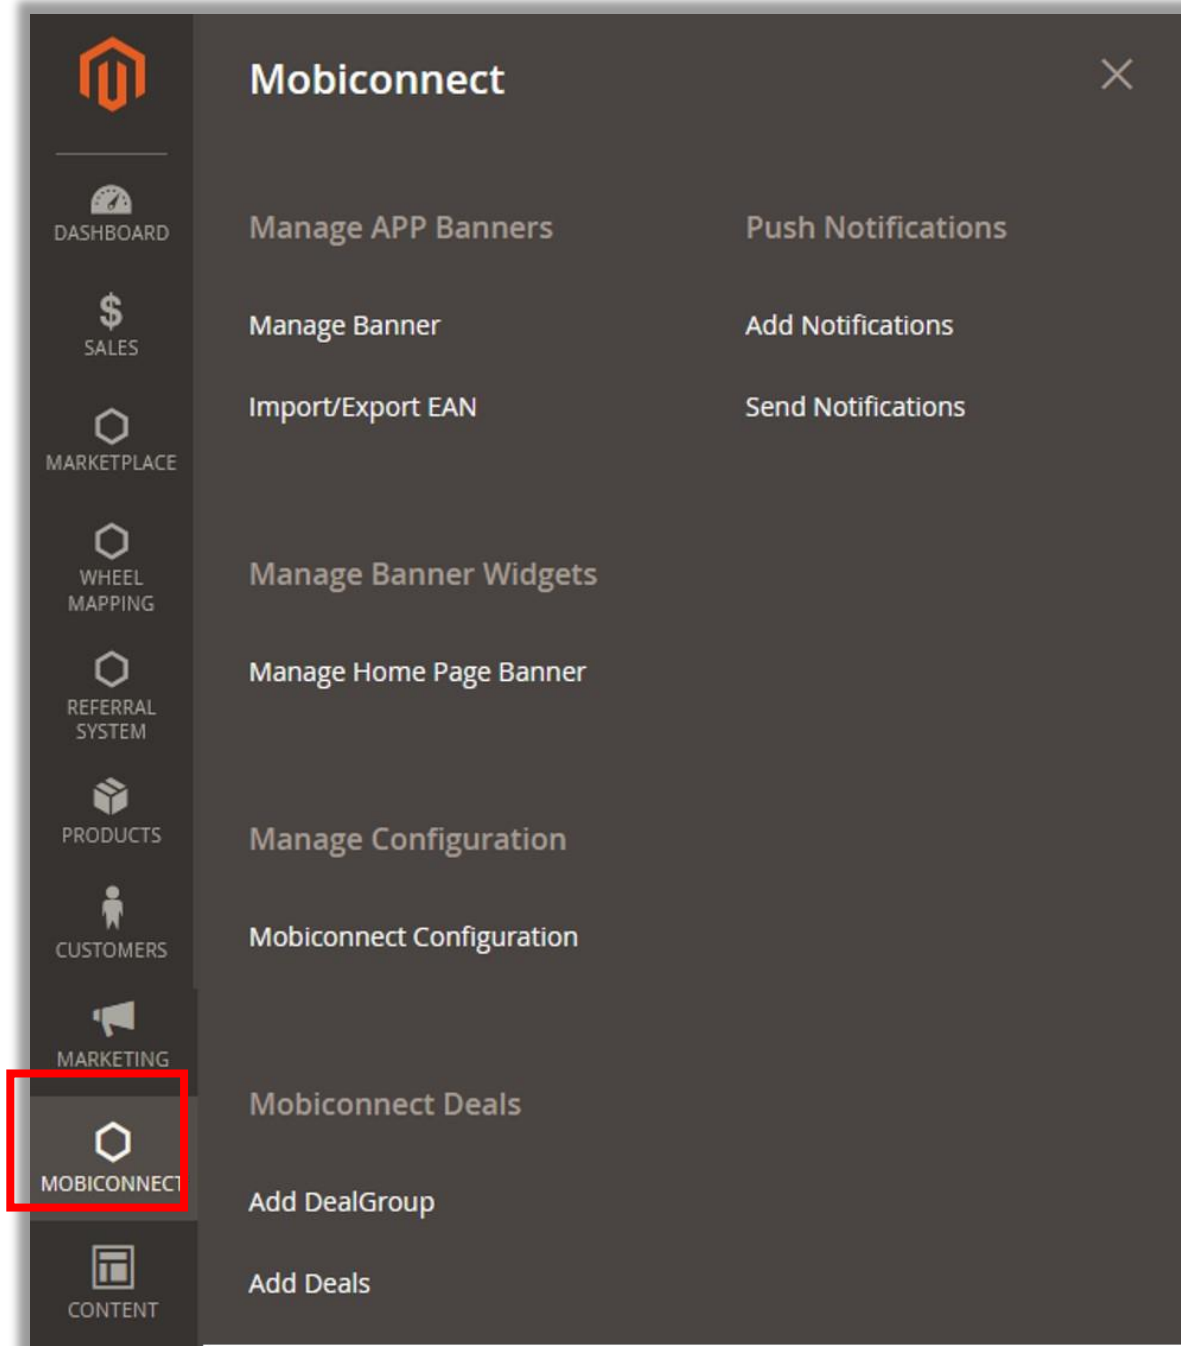

Figure 1

Mobiconnect Configuration

After App building and connector installation, the admin has to configure the various features of the app through the Admin panel. The Admin has rights to enable or disable the features of the extension.

To set up the configuration settings

- 1) Go to the **Admin** panel.
- 2) On the left navigation bar, click the **MOBICONNECT** menu, and then click **Mobiconnect Configuration**.

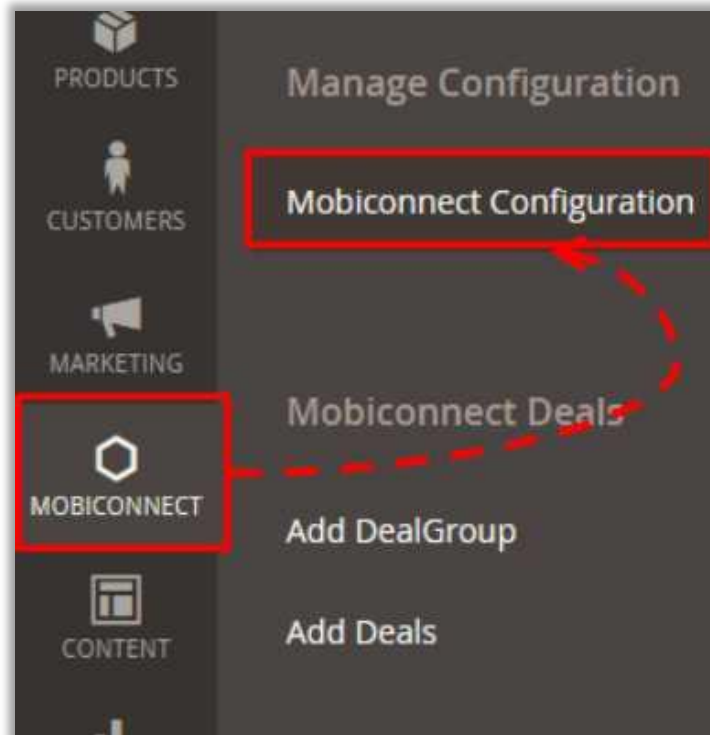

Figure 2

The **Configuration** page appears as shown in the **Figure 3**.

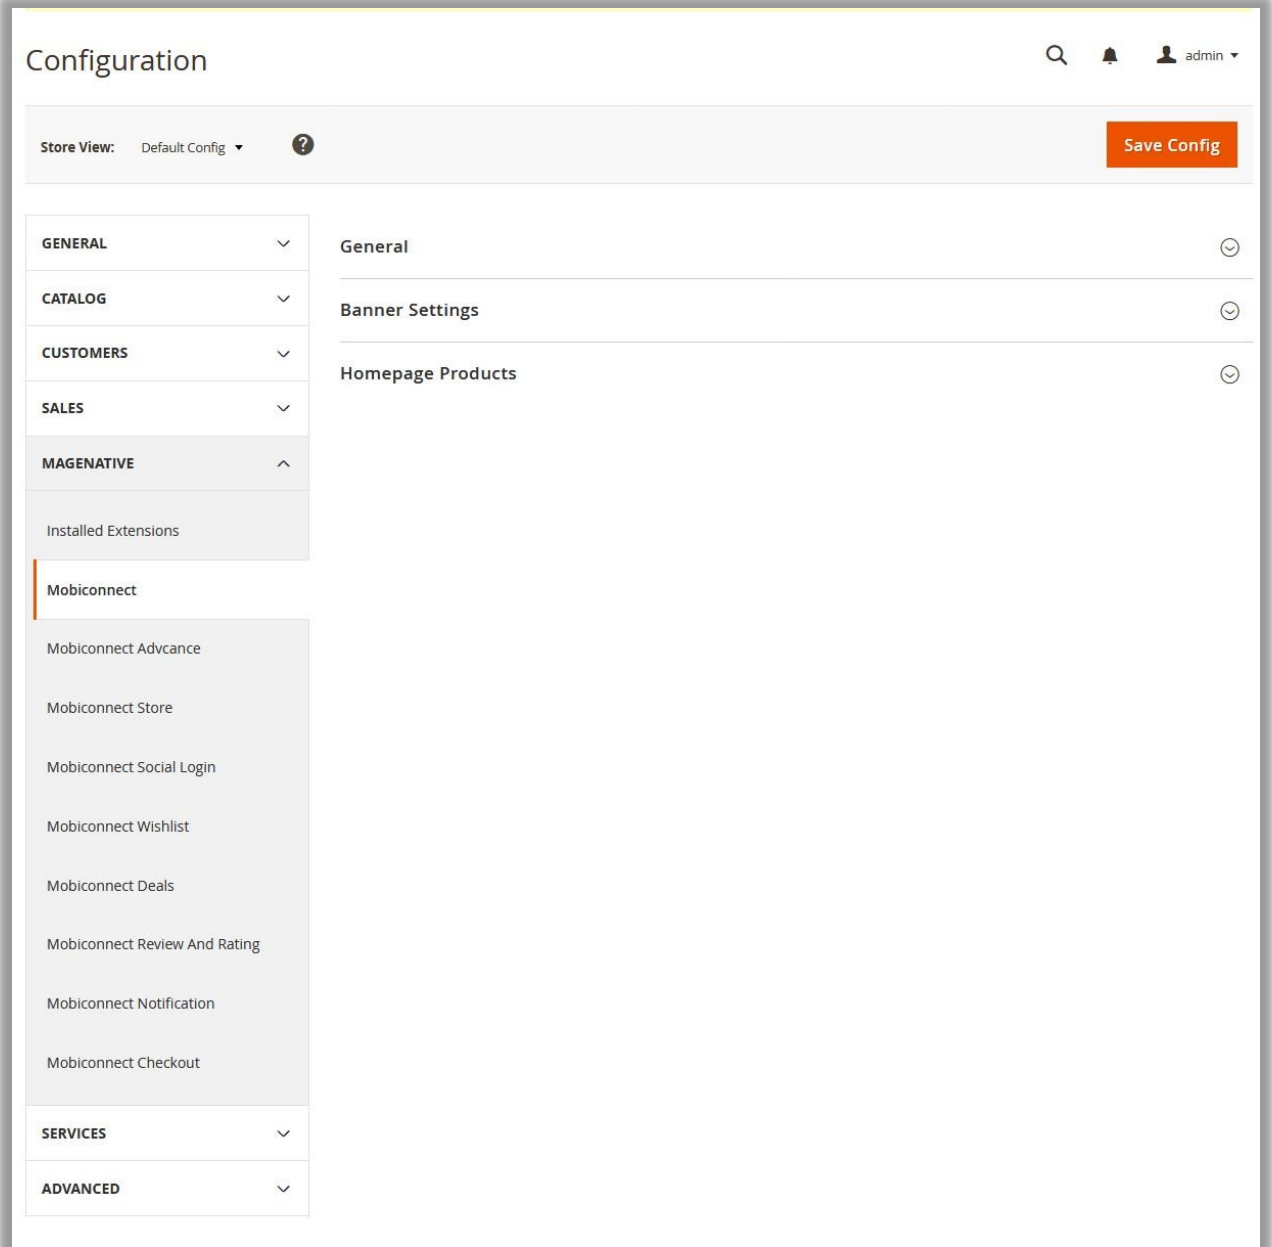

Figure 3

The **MAGENATIVE** menu in the left navigation panel appears as shown in the **Figure 4**.

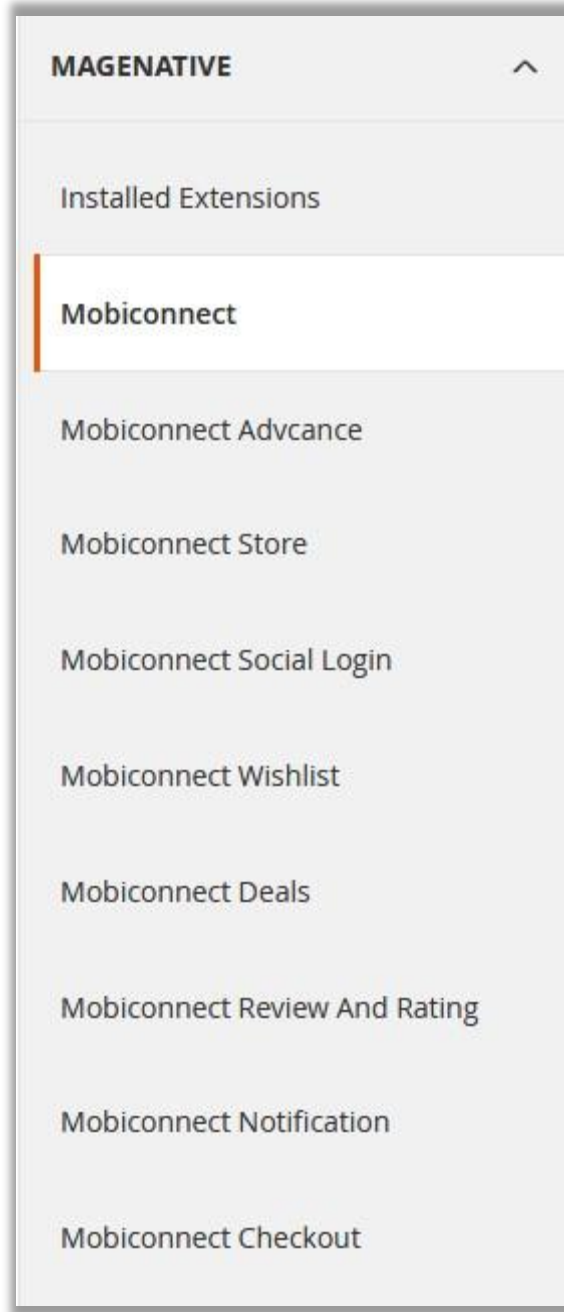

Figure 4

Note  : While setting the configuration, admin can click the **Save Config** button, to save the settings at any point.

3) In the right panel, click the **General** tab.

The **General** tab is expanded and the relevant fields appear as shown in the **Figure 5**.

The screenshot shows the 'Configuration' page with the 'General' tab selected. The left sidebar contains a menu with 'GENERAL', 'CATALOG', 'CUSTOMERS', 'SALES', 'MAGENATIVE', and 'Mobiconnect'. The 'General' tab is highlighted with a red box. The main content area displays the following configuration fields:

- Enable** (store view): A dropdown menu with 'Yes' and 'No' options. A checkbox labeled 'Use system value' is checked.
- Force Customer To install Update** (store view): A dropdown menu with 'No' and 'Yes' options. A checkbox labeled 'Use system value' is checked.
- Header Hash Key** (store view): A text input field. A checkbox labeled 'Use system value' is checked. Below the field is a note: 'Enter the secret key which you received during app building process'.
- Current APP Version On Store** (store view): A text input field. A checkbox labeled 'Use system value' is checked. Below the field is a note: 'APP Version On Playstore/appstore'.

Below these fields are two sections: 'Banner Settings' and 'Homepage Products', each with a dropdown arrow.

Figure 5

4) Under **General**, do the following steps:

a) In the **Enable** list, do one of the following:

- Select the corresponding **Use System Value** check box, to use the default value.

OR

- Clear the **Use System Value** check box, and then enter the required value in the **Enable** list.

Note : If the admin selects the **No** option, then the **Mobiconnect** module is disabled.

b) In the **Force Customer To Install Update** list, do one of the following:

- Select the corresponding **Use System Value** check box, to use the default value.

OR

- Clear the **Use System Value** check box, and then enter the required value in the **Enable** list.

Note : To make it mandatory for the front-end users to install the update, select the **Yes** option.

c) In the **Header Hash Key** box, enter the secret key provided while app building process.

Note : Select the corresponding **Use System Value** check box, to use the default value.

d) In the **Current APP Version On Store** box, enter a value.

Enter the app version on Play store or app store.

5) In the right panel, click the **Banner Settings** tab.

The **Banner Settings** tab is expanded and the relevant field appears as shown in the **Figure 6**.

Figure 6

6) Under **Banner Settings**, in the **Show Banner On Home Page** list, do one of the following:

- Select the corresponding **Use System Value** check box, to use the default value.

OR

- Clear the **Use System Value** check box, and then enter the required value in the **Enable** list.

Note : If the admin selects the **No** option, then the **Banner Settings** feature is disabled.

7) In the right panel, click the **Homepage Products** tab.

The **Homepage Products** tab is expanded and the relevant fields appear as shown in the **Figure 7**.

Figure 7

8) Under **Homepage Products**, do the following steps:

a) In the **Enabled** list, do one of the following:

- Select the corresponding **Use System Value** check box, to use the default value.

OR

- Clear the **Use System Value** check box, and then enter the required value in the **Enable** list.

Note : If the admin selects the **No** option, then the **Homepage Products** feature is disabled.

b) In the **Select Category** list, select the required option.

9) On the **MAGENATIVE** menu, click **Installed Extensions**.

In the right panel, under **Installed Extensions**, the corresponding fields appear as shown in the **Figure 8**.

Import or Export EAN

EAN (European Article Number) is a numeric only barcode system used in global trade. It is used to identify a specific retail product type, in a specific packaging configuration, from a specific manufacturer. EAN barcodes can also be used as numbers for wholesale order or account maintenance.

With the Barcode Scanner the front-end user can capture image of a barcode of the required product. The Barcode reader then uses the advanced digital image processing techniques to decode the EAN barcode, which is then converted into the matching numbers.

The admin can maintain the records of EAN barcodes provided with the corresponding product, to facilitate the users to search their product by using the required barcodes.

The Admin can perform the following tasks:

- Import EAN
- Export EAN

To Import or Export EAN

- 1) Go to the **Admin** panel.
- 2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Import/Export EAN**.

The **Import and Export Product EAN** page appears as shown in the **Figure 24**.

- 5) In the **Offer Text** box, enter the offer related texts.

For example: Upto 50% Off, or Buy 1 Get 1 Free, or so on.

- 6) Click the **Enable**  icon to switch to the enable or disable mode.

Tips  :

-  : Resembles the **Enable** mode.
-  : Resembles the **Disable** mode.

- 7) Click the **Upload** button, next to the **Image** field, to upload the image.

The image relevant to the deal.

8) In the **Store View** list, select the required website.

10) In the **Choose Link Type** list, select one of the following options:

- **Product in app:** To redirect the user to the Products page available on the Front-end view of the app.

Note : When the admin selects the **Product in app** option, then the **Choose Product** field appears below the field.

- In the **Choose Product** list, select the specific product to redirect the user to the selected product page.

- **Category in app:** To redirect the user to the Category page available on the Front-end view of the app.

Note : When the admin selects the **Category in app** option, then the **Choose Category** field appears below the field.

- In the **Choose Category** list, select the category to redirect the user to the selected category page.

- **Static Link:** To redirect the user to the specific link provided.

Note : When the admin selects the **Static Link** option, then the **Static Link** field appears below the field.

- In the **Static Link** box, enter the required link to redirect the user to that particular page.

9) Click the **Save Deal** button.

The new deal is saved and the **New Deal** page is closed.

To edit the existing deal

1) Go to the **Admin** panel.

2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Add Deals**.

The **Deal(s)** page appears as shown in the **Figure 37**.

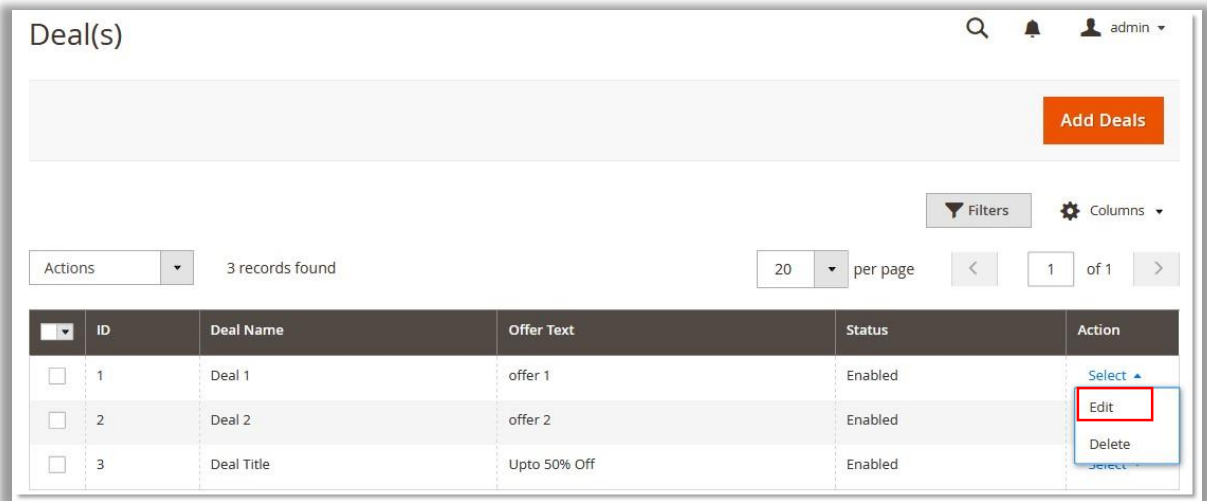

Figure 37

- 3) In the **Actions** column, click the arrow next to the **Select** link associated with the required deal, and then click **Edit**.

The selected deal page appears for editing.

- 4) Make the required changes, and then click the **Save** Deal button.

The changes made in the selected deal are saved and the page is closed.

To delete the existing deal

- 1) Go to the **Admin** panel.
- 2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Add Deals**.

The **Deal(s)** page appears as shown in the **Figure 38**.

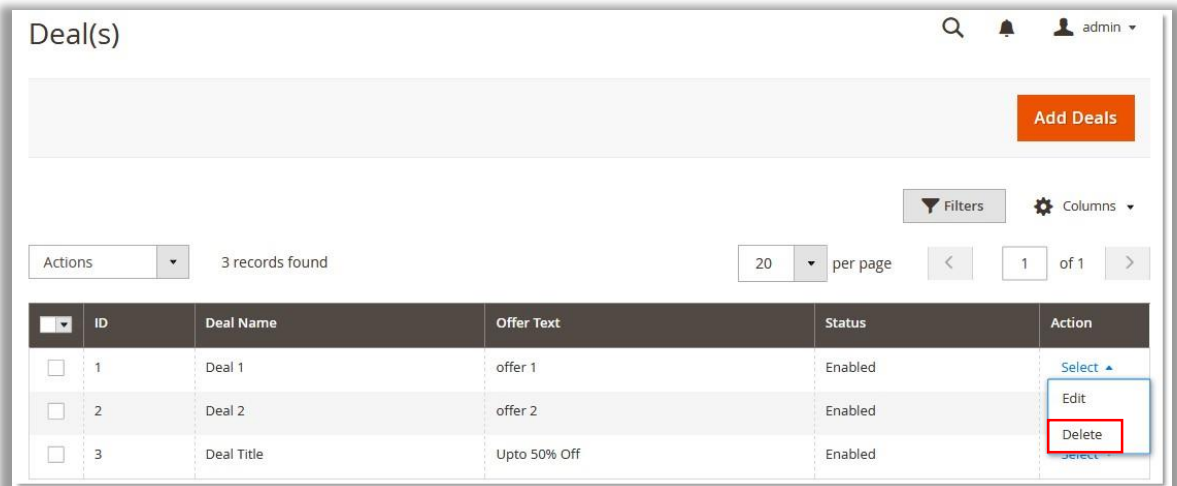

Figure 38

- 3) In the **Actions** column, click the arrow next to the **Select** link associated with the required deal, and then click **Delete**.

A confirmation dialog box appears.

- 4) Click the **OK** Deal button.

The selected deal is deleted and a success message appears.

Note  : Admin can also delete the selected deal from the editing page.

Deal Groups

After creating the various deals, the admin can assign all the deals to the different deal groups.

Note  : Until and unless the deal is assigned to any deal group, it is not available on the app home page.

Admin can perform the following tasks:

- [Add Deal Groups](#)
- [Edit Deal Groups](#)
- [Delete Deal Groups](#)

To add deal groups

- 1) Go to the **Admin** panel.
- 2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Add DealGroup**.

The **Deal Group(s)** page appears as shown in the **Figure 39**.

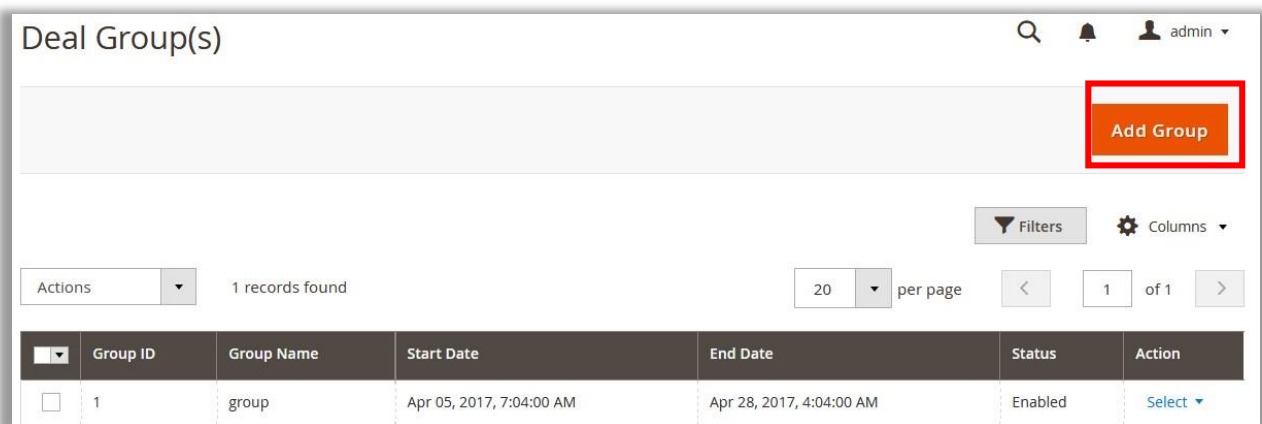

Figure 39

- 3) Click the **Add Group** button.

The **New Group** page appears as shown in the **Figure 40**.

Figure 40

4) In the **Title** box, enter the title for the deal group.

5) Click the **Enable**  icon to switch to the enable or disable mode.

Tips  :

-  : Resembles the **Enable** mode.
-  : Resembles the **Disable** mode.

6) Click the **Show Timer**  icon to switch to the enable or disable mode.

7) Click the **Is Static**  icon to switch to the enable or disable mode.

8) In the **Store View** list, select the required website.

9) In the **From** box, click the **Calendar**  icon.

The calendar appears as shown in the **Figure 41**.

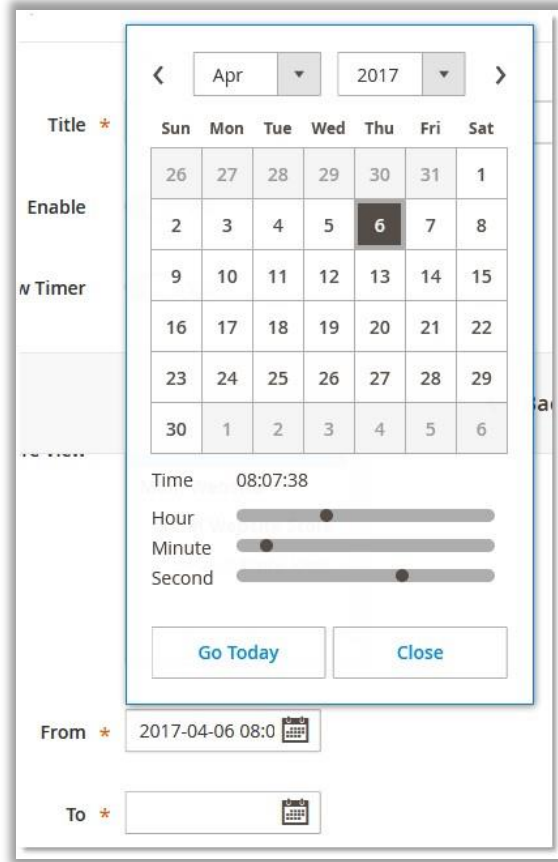

Figure 41

10) Select the required date from the calendar.

11) Drag the pointer on the **Hour**, **Minute**, and **Second** time bar, as shown in the **Figure 36**.

Tip  : Click the **Go Today** button to select the current date.

12) Click the **Close** button.

13) In the **To** box, click the **Calendar**  icon.

14) Follow the steps from **10** to **12**.

15) Click the **Deal Group** tab.

The tab is expanded, and the available Deals are listed in the tabular format as shown in the **Figure 42**.

The screenshot shows the 'New Group' interface. At the top, there are navigation links: 'Back', 'Reset', 'Save and Continue Edit', and a prominent 'Save Group' button. Below the header, the section is titled 'Deals in Group'. There is a search bar with a 'Search' button and a 'Reset Filter' link. It indicates '1 records found'. A pagination control shows '20' items per page, with '1' of 1 page. Below this is a table with the following columns: 'ID', 'Title', and 'Offer Text'. The table contains one row with ID '1', Title 'Deal', and Offer Text 'Offer'. There is a checkbox in the first column of the table.

Figure 42

16) Select the **Check Box** associated with the deal that the admin wants to assign to the Deal Group.

17) Click the **Save Group** button.

To edit the existing deal group

1) Go to the **Admin** panel.

2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Add DealGroup**.

The **Deal Group(s)** page appears as shown in the **Figure 43**.

The screenshot shows the 'Deal Group(s)' interface. At the top right, there are icons for search, notifications, and a user profile labeled 'admin'. Below the header, there is an 'Add Group' button. A 'Filters' button and a 'Columns' dropdown menu are also visible. A pagination control shows '20' items per page, with '1' of 1 page. Below this is a table with the following columns: 'Group ID', 'Group Name', 'Start Date', 'End Date', 'Status', and 'Action'. The table contains one row with Group ID '1', Group Name 'group', Start Date 'Apr 05, 2017, 7:04:00 AM', End Date 'Apr 28, 2017, 4:04:00 AM', and Status 'Enabled'. In the 'Action' column, there is a 'Select' link with a dropdown arrow. The dropdown menu is open, showing 'Edit' and 'Delete' options.

Figure 43

3) In the **Actions** column, click the arrow next to the **Select** link associated with the required deal group, and then click **Edit**.

The selected deal group page appears for editing.

- 4) Make the required changes, and then click the **Save Group** button.

The changes made in the selected deal group are saved and the view moves to the **Deal Group(s)** page.

To delete the existing deal group

- 1) Go to the **Admin** panel.
- 2) On the left navigation bar, click the **Mobiconnect** menu, and then click **Add DealGroup**.

The **Deal Group(s)** page appears as shown in the **Figure 44**.

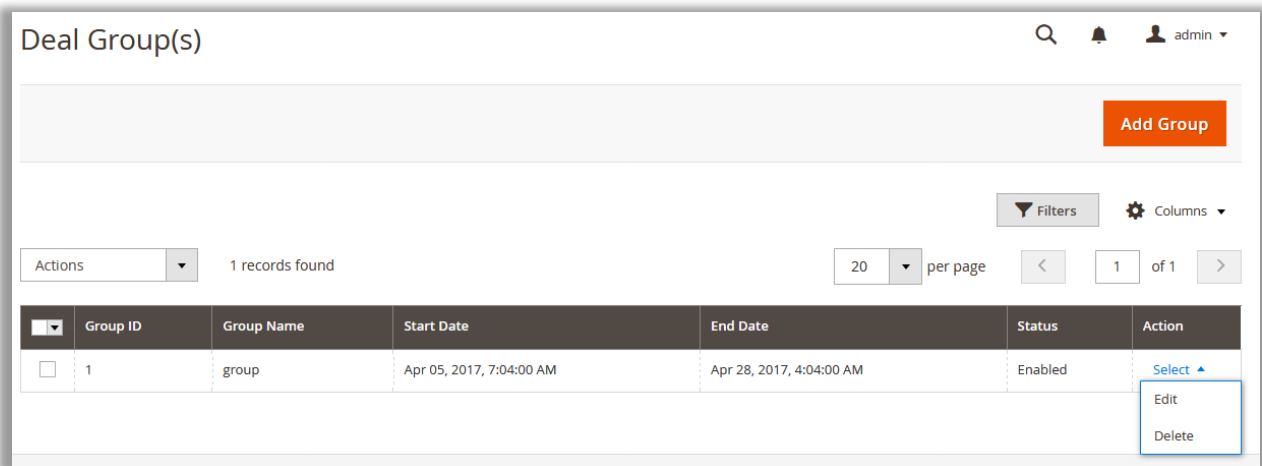

Figure 44

- 3) In the **Actions** column, click the arrow next to the **Select** link associated with the required deal group, and then click **Delete**.

A Confirmation dialog box appears.

- 4) Click the **OK** button.

The deal group is deleted and a success message appears.

Note : Admin can also delete the selected deal group from the editing page.

Notifications

The admin can do the following tasks:

- [Add New Notifications](#)
- [Edit Existing Notifications](#)
- [Send Selected Notifications](#)
- [Delete Selected Notifications](#)

To add a new notification
